REPORT ON REVIEW OF INTERIM CONSOLIDATED FINANCIAL STATEMENTS TO THE MEMBERS OF THE BOARD OF DIRECTORS OF EMAAR MISR FOR DEVELOPMENT COMPANY (S.A.E.)

Introduction

We have reviewed the accompanying consolidated statement of financial position of **EMAAR MISR FOR DEVELOPMENT COMPANY – (S.A.E.)** and its subsidiary as of 31 March 2019 as well as the related consolidated statements of profit or loss, comprehensive income, changes in equity and cash flows for the three-month period then ended, and a summary of significant accounting policies and other explanatory notes. Management is responsible for the preparation and fair presentation of these interim financial statements in accordance with Egyptian Accounting Standards. Our responsibility is to express a conclusion on these interim financial statements based on our review.

Scope of Review

We conducted our review in accordance with Egyptian Standard on Review Engagements No. 2410, "Review of Interim Financial Statements Performed by the Independent Auditor of the Entity." A review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Egyptian Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim consolidated financial statements does not give a true and fair view, in all material respects, of the consolidated financial position of the entity and its subsidiary as at 31 March 2019, and of its financial performance and its cash flows for the three-month period then ended in accordance with Egyptian Accounting Standards.

Emaar Misr for Development Company (S.A.E)

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

31 March 2019

1 BACKGROUND

Emaar Misr for Development Company (S.A.E.) (the “Company” or the “Parent Company”) is a joint stock company established in Egypt under the Investment Guarantees and Incentives Law No. 8 of 1997. The Company was registered in the commercial register on 16 March 2005 under No. 12841.

The listing of Emaar Misr for Development Company (S.A.E.) on the Egyptian stock exchange was approved in 4 March 2015 according to resolution of listing committee of Egyptian stock exchange.

The purpose of the Group is:

- Planning and construction of urban districts and providing them with utilities and services,
- Designing, constructing, managing, operating and maintenance of power plants with their different sources and distribution networks.
- Constructing, operating, managing and maintenance of water desalination and refining plants together with their distribution networks,
- Constructing, operating, managing and maintenance of sewage systems,
- Projects development, investment and real estate development,
- Owning, constructing, managing and touristic marketing for hotels, motels, lodges and tourism villages and its related supplementary activities in servicing, entertainment, sporting, commercial, and cultural,
- Establishing and operating yachts marina, golf courses and diving centres and its related supplementary activities,
- Finance leasing,

The Group is currently engaged in planning and construction of urban districts and providing them with utilities, services and projects development, investment and real estate development.

The Group’s ultimate parent is Emaar Properties PJSC.

These consolidated financial statements for the period ended 31 March 2019 were authorized for issuance in accordance with the resolution of the directors on 2 May 2019.

2.1 BASIS OF PREPARATION

The consolidated financial statements of the group are prepared in accordance with Egyptian Accounting Standards (“EAS”) and the applicable laws and regulations.

The consolidated financial statements have been prepared in Egyptian pounds (EGP), which is the groups’s functional and presentation currency.

The consolidated financial statements have been prepared under the going concern assumption on a historical cost basis.

2.2 BASIS OF CONSOLIDATION

The consolidated financial statements comprise the financial statements of the Parent Company and its subsidiary as at and for the period ended 31 March 2019. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Specifically, the Group controls an investee if, and only if, the Group has:

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee
- The ability to use its power over the investee to affect its returns

2.2 BASIS OF CONSOLIDATION (continued)

The Group re-assess whether or not it controls an investee if facts and circumstances indicates that there are changes to one or more of the three elements of controls. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the period are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Accounting for business combination under EAS 29 only applies if it is considered that a business has been acquired. For acquisitions meeting the definition of a business, the acquisition method of accounting is used to account for the acquisition of subsidiaries by the Parent Company. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any Non-controlling interest. The excess of the cost of acquisition over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized directly in the consolidated statement of profit or loss.

The following steps are followed in preparing the consolidated financial statements:

- a- Eliminate the carrying amount of the Parent Company investment in each subsidiary and the Parent Company share of equity of each subsidiary.
 - b- Identify the non-controlling interest in the profit or loss of the consolidated subsidiaries for the reporting period.
 - c- Identify the non-controlling interests in the net assets of consolidated subsidiaries and presented in the consolidated financial statement separately from the Parent ownership interests. Non-controlling interests in the net assets consist of:
 - (1) The amount of non-controlling interests as of the original date of combination.
 - (2) The non-controlling interests' share of changes in equity since the date of the combination.
 - d- Intergroup balances and transactions, revenues and expenses are eliminated.
- The separate financial statements of the Parent Company and its subsidiaries used in the preparation of the consolidated financial statements are prepared as of the same date.
 - The separate financial statements of the Parent Company and its subsidiaries used in the preparation of the consolidated financial statements are prepared using uniform accounting policies for similar transactions and other events with similar circumstances.
 - Non-controlling interests are presented in the consolidated financial position within equity, separately from the equity of the owners of the Parent Company, and the non-controlling interests share in the group profit or loss is presented separately.
 - Non-controlling interests presented in the consolidated financial statements are as follows:

Company name	% of non-controlling interest
IJADA Facility Management L.L.C	15%

2.3 CHANGES IN ACCOUNTING POLICIES

The accounting policies adopted this Period are consistent with those of the previous period.

2.4 SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES

The preparation of these consolidated financial statements requires management to make judgments and estimates that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures and the disclosure of contingent liabilities at the reporting date. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the assets or liabilities affected in future years.

Estimates and their underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimates are revised.

The key judgements and estimates that have a significant impact on the consolidated financial statements of the Company are discussed below:

2.4 SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES (continued)

Judgments

Revenue recognition for real estate units

In making their judgment, the management considered the detailed criteria for the recognition of revenue from the sale of real estate units as set out in EAS 11 *Revenue*, and, in particular, whether the Company had transferred to the buyer the significant risks and rewards of ownership of the real estate units.

Classification of properties

The Company determines whether a property is classified as investment property or development property:

Investment property comprises land and buildings that are not occupied substantially for use by, or in the operations of, the Company, nor for sale in the ordinary course of business, but are held primarily to earn rental income and capital appreciation. These land and buildings are substantially rented to tenants and not intended to be sold in the ordinary course of business.

Development property comprises property that is held for sale in the ordinary course of business. Principally, this is residential property that the Company develops and intends to sell before or on completion of construction.

Operating lease commitments – Company as lessor

The Company has entered into leases on its investment properties. The Company has determined, based on an evaluation of the terms and conditions of the arrangements, finance lease criteria are not met and accounts for the contracts as operating leases.

Estimations

Estimation of net realisable value for development property

Development property is stated at the lower of cost or net realisable value (NRV).

NRV for completed property is assessed by reference to market conditions and prices existing at the reporting date and is determined by the Company, based on comparable transactions.

NRV in respect of development property under construction is assessed with reference to market prices at the reporting date for similar completed property, less estimated costs to complete construction.

Valuation of investment properties

The Company hires the services of third party professionally qualified valuers to obtain estimates of the market value of investment properties using recognised valuation techniques for the purposes of their impairment review and disclosures in the consolidated financial statements.

Impairment of trade and other receivables

An estimate of the collectible amount of trade and other receivables is made when collection of the full amount is no longer probable. For individually significant amounts, this estimation is performed on an individual basis. Amounts which are not individually significant, but which are past due, are assessed collectively and a provision applied according to the length of time past due, based on historical recovery rates.

Useful lives of fixed assets and investment properties

The Company's management determines the estimated useful lives of its fixed assets and investment properties for calculating depreciation. This estimate is determined after considering the expected usage of the asset or physical wear and tear. The management periodically reviews estimated useful lives and the depreciation method to ensure that the method and period of depreciation are consistent with the expected pattern of economic benefits from these assets.

Cost to complete the projects

The Company estimates the cost to complete the projects in order to determine the cost attributable to revenue being recognised. These estimates include the cost of providing infrastructure, potential claims by contractors as evaluated by the project consultant and the cost of meeting other contractual obligations to the customers.

Taxes

The Company is subject to income taxes in Egypt. Significant judgment is required to determine the total provision for current and deferred taxes. The Company established provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities in Egypt. The amount of such provision is based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the Company and the responsible tax authority. Such differences of interpretations may arise on a wide variety of issues depending on the conditions prevailing in Egypt.

2.4 SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES (continued)

Estimations – Continued

Deferred tax assets are recognised for unused accumulated tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

Impairment of non-financial assets

The Company assesses whether there are any indicators of impairment for all non-financial assets at each reporting date. The non-financial assets are tested for impairment when there are indicators that the carrying amounts may not be recoverable. When value in use calculations are undertaken, management estimates the expected future cash flows from the asset or cash-generating unit and chooses a suitable discount rate in order to calculate the present value of those cash flows.

2.5 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue and costs, if applicable, can be measured reliably.

Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes and duty.

The specific recognition criteria described below must also be met before revenue is recognized.

Revenue of sale of completed development property

The Company recognises revenue of sale of property when the risks and rewards of ownership of the property have been transferred to the buyer which occurs when the units are delivered either actually or implied.

Rental income from lease of investment properties

Rental income arising from operating leases on investment property is accounted for on a straight-line basis over the lease terms in other income in the Statement of Profit or Loss.

Hospitality revenue

Revenue from hotel accommodation, food and beverages and other services are recognised, net of discount and municipality fees, at the point at which the services are rendered in other income in the Statement of Profit or Loss.

Finance income

Finance income is recognised as it accrues using the effective interest rate (EIR) method. EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or liability.

Customers' charges

Income arising from providing utilities (water and electricity) to customers is recognised when rendered. Customer charges revenues are included in other income in the Statement of Profit or Loss.

Borrowing

Borrowings are initially recognized at the value of the consideration received. Amounts maturing within a year are classified as current liabilities, unless the Company has the right to postpone the settlement for a period exceeding one year after the financial position date, then the loan balance should be classified as long term liabilities.

After initial recognition, credit facilities are subsequently measured at amortized cost using the effective interest rate method. Gains and losses are recognized in the statement of profit or loss when the liabilities are derecognized as well as through the effective interest rate method amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fee or costs that are an integral part of the effective interest rate. The effective interest rate amortization is included in finance cost in the statement of profit or loss.

2.5 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Borrowing cost

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale are capitalised as part of the cost of the assets. All other borrowing costs are expensed in the year in which they are incurred. The borrowings costs are represented in interest and other finance costs that company pay to obtain the funds.

Income tax

Income tax is calculated in accordance with the Egyptian tax law.

Current income tax

Current income tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from or paid to the tax authority.

Deferred income tax

Deferred income tax is recognized using the liability method on temporary differences between the amount attributed to an asset or liability for tax purposes (tax base) and its carrying amount in the financial position (accounting base) using the applicable tax rate.

Deferred tax asset is recognized when it is probable that the asset can be utilized to reduce future taxable profits and the asset is reduced by the portion that will not create future benefit.

Current and deferred tax shall be recognized as income or an expense and included in the statement of profit or loss for the year, except to the extent that the tax arises from a transaction or event which is recognized, in the same or a different year, directly in equity.

Development Properties

Properties acquired, constructed in the course of construction for sale are classified as development properties. Unsold properties are stated at the lower of cost or net realizable value.

The cost of development properties includes the cost of land and other related expenditure which are capitalized when activities that are necessary to get the properties ready for sale are in progress. Net realizable value represents the estimated selling price less costs to be incurred in selling the property.

Investment properties

Investment properties are land and buildings which are held to earn rental or for capital appreciation or both. Investments properties are measured at cost including acquisition cost or construction cost or any other related direct cost.

After initial recognition Investment properties are measured at cost less accumulated depreciation and any accumulated impairment value depreciation is completed using the straight line method according to the estimated useful life of the assets (20 – 50 years).

Held to maturity investments

Held to maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the company's management has the positive intention and ability to hold to maturity.

This classification requires using high degree of professional judgment and to achieve that, the company evaluate its intention of keeping these investments till maturity date. If not, except in some rare circumstances such as selling of insignificant investments prior to maturity date then, all held to maturity investments re-classified to available for sale investments. Accordingly, Investments will be measured at fair value not amortized cost and cease any classification of investments.

Held to maturity investments are initially recognized at fair value inclusive direct attributable expenses.

After initial recognition, the held to maturity investments are measured at amortized cost using the effective interest method less impairment. Gains and losses are recognized in statement of profit or loss when the investments are derecognized or impaired, impairment is recovered, as well as through the amortization process

2.5 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**Fixed assets**

Fixed assets are stated at historical cost net of accumulated depreciation and accumulated impairment losses. Such cost includes the cost of replacing part of the plant and equipment when that cost is incurred, if the recognition criteria are met. Likewise, when a major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in statement of profit or loss as incurred.

Depreciation of an asset begins when it is in the location and condition necessary for it to be capable of operating in the manner intended by management, and is computed using the straight-line method according to the estimated useful life of the asset as follows:

	Years
Buildings	20-50
Model homes and other assets	6
Machinery and equipment	4
Motor vehicles	4
Computers	2
Furniture, fixtures and office equipment	4
Banners	4
Heavy equipment	4-20
Tools	2

Fixed assets are derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognizing of the asset is included in the statement of profit or loss when the asset is derecognized.

The assets residual values, useful lives and methods of depreciation are reviewed at each financial year end.

The Company assesses at each financial position date whether there is an indication that fixed assets may be impaired. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. Impairment losses are recognized in the statement of profit or loss.

A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized.

The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the statement of profit or loss.

Fixed assets under construction

Fixed assets under construction represent the amounts that are paid for the purpose of constructing or purchasing fixed assets until it is ready to be used in the operation, upon which it is transferred to fixed assets. Fixed assets under construction are valued at cost net of impairment loss (if any).

Impairment***Impairment of financial assets***

The Company assesses at each financial position date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset and has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated.

Impairment of non financial assets

The Company assesses at each financial position date whether there is an indication that an asset may be impaired. Where the carrying amount of an asset or cash-generating unit's (CGU) exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. Impairment losses are recognized in the statement of profit or loss.

2.5 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Impairment - Continued

A previously recognized impairment loss is only reversed if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the statement of profit or loss.

Cash and cash equivalents

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash in hand, bank balances, and short-term deposits with an original maturity of three months.

Trade payables and accrued expenses

Liabilities are recognised for amounts to be paid in the future for goods or services received, whether billed by the suppliers and contractors or not.

Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. Provisions are reviewed at the financial position date and adjusted to reflect the current best estimate.

Where the effect of the time value of money is material, the amount of a provision should be the present value of the expected expenditures required to settle the obligation. Where discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

Social insurance and Employees' End-of-services

a- Social Insurance: The Company makes contributions to the General Authority for Social Insurance calculated as a percentage of the employees' salaries. The Company's obligations are limited to these contributions, which are expensed when due.

b- Employees' End-of-services: The Company provides end-of-service benefits to its employees. The entitlement to these benefits is usually based upon the employees' final salary and length of service, subject to the completion of a minimum service period. The costs of these benefits are accrued over the period of employment.

Foreign currencies

Transactions in foreign currencies are recorded at the rate prevailing at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are retranslated using the exchange rate prevailing at the financial position date. All differences are recognized in the statement of profit or loss.

Nonmonetary items that are measured at historical cost in foreign currency are translated using the exchange rates prevailing at the dates of the initial recognition.

Nonmonetary items measured at fair value in a foreign currency are translated using the exchange rates prevailing at the date when the fair value is determined.

Contingent Liabilities and Assets

Contingent liabilities are not recognized in the consolidated financial statements. They are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. A contingent asset is not recognized in the consolidated financial statements but disclosed when an inflow of economic benefits is probable.

Related party transactions

Related parties represent in ultimate parent company, associated companies, major shareholders, directors and key management personnel of the Company, and entities controlled, jointly controlled or significantly influenced by such parties. Pricing policies and terms of these transactions are approved by the boards of directors.

2.5 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Statement of cash flows

The statement of cash flows is prepared using the indirect method.

Expenses

All expenses including operating expenses, general and administrative expenses and other expenses are recognized and charged to the statement of profit or loss in the financial year in which these expenses were incurred.

Accounts receivable and other debit balances

Accounts receivable and other debit balances are stated at book less any impairment losses.

Impairment losses are measured as the difference between the receivables carrying amount and the present value of estimated future cash flows. The impairment loss is recognized in the statement of profit or loss. Reversal of impairment is recognized in the statement of profit or loss in the year in which it occurs.

Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability or the most advantageous market for the asset or liability.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

For assets traded in an active market, fair value is determined by reference to quoted market bid prices.

The fair value of interest-bearing items is estimated based on discounted cash flows using interest rates for items with similar terms and risk characteristics.

For unquoted assets, fair value is determined by reference to the market value of a similar asset or is based on the expected discounted cash flows.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 – Fair value measurements are those derived from quoted prices in an active market (that are unadjusted) for identical assets or liabilities.
- Level 2 – Fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 – Fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

For assets and liabilities that are recognised in the consolidated financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

3 SEGMENT INFORMATION

Currently the Company's main business segment is developing projects and selling the developed units. Revenues, profits and investments in other business segments are currently immaterial. Accordingly retail, commercial and hospitality business segments do not meet the criteria of reportable segments under EAS (41), and as such, are not separately disclosed in the consolidated financial statements. All revenues of the Company in the period ended 31 March 2019 were reported under one segment in the consolidated financial statements.

	635,187,371	495,136,462

The movement of fixed assets under construction during the period ended 31 March 2019 and 2018 is as follows:

	31 March 2019 EGP	31 March 2018 EGP
Beginning balance	495,136,462	301,988,498
Additions during the period	140,050,909	268,039,995
Ending balance	635,187,371	570,028,493

6 BUSINESS COMBINATION

During April 2018, the parent company acquired 85% of the quotas of "Emaar Facility Management L.L.C." which amounts to EGP 50,000 at its par value. The cost of investment amounted to EGP 42,500. The Company changed its legal name of its newly acquired subsidiary to become "IJADA Facility Management L.L.C." This business combination did not result in goodwill or bargain purchase gain.

Net carrying amount	364,891,251	270,492,391

The valuation of the company's investment properties are performed by Arab Group for Appraisals & Consultancy (independent valuer). The fair value of investment properties is EGP 285,470,290 at 31 December 2018

The buildings and land are valued using market approach by an independent valuer. The market was researched and a minimum of three recent sales of properties were selected that were considered to be most comparable to the subject property. Adjustment was made when appropriate to reflect the market reaction to those items of significant variation. If a significant item in a comparable property is superior to, or more favourable than, the subject property a negative adjustment was made to reduce the sales price of the comparable and, if a significant item in a comparable property is inferior to, or less favourable than the subject property, a positive adjustment was made to increase the adjusted sales price of the comparable.

Emaar Misr for Development Company (S.A.E.)

7 INVESTMENT PROPERTIES (Continued)

Fair value hierarchy

The Company uses the following hierarchy for determining and disclosing the fair value of its investment properties by valuation technique:

	Total EGP	Level 1 EGP	Level 2 EGP	Level 3 EGP
31 March 2019*	285,470,290	-	-	285,470,290
31 December 2018	285,470,290	-	-	285,470,290

* The fair value of investment properties is based on latest valuation at 31 December 2018.

8 DEVELOPMENT PROPERTIES

	31 March 2019 EGP	31 March 2018 EGP
Balance at the beginning of the period	12,316,514,109	11,736,727,039
Add: Cost incurred during the period	1,251,043,156	753,220,731
Add: Borrowing costs capitalised during the period	623,181	1,093,915
Add: Depreciation of fixed assets (capitalised portion) (Note 4)	272,625	272,625
Less: Transfers to investment properties (Note 7)	(46,632,510)	-
Less: Transfers to cost of revenue during the period	(282,697,022)	(480,359,736)
Balance at the end of the period	13,239,123,539	12,010,954,574

Properties acquired, constructed or in the course of construction for sale in the ordinary course of business are classified as development properties and include the costs of:

- Land;
- Amounts paid to contractors for construction including the cost of construction of infrastructure; and
- Borrowing costs, planning and design costs, costs of site preparation, professional fees for legal services, construction overheads and other related costs.

Common infrastructure costs are allocated to various projects and forms part of the estimated cost to complete a project in order to determine the cost attributable to revenue being recognised. The development plan of some of the development properties is estimated to be over 10 years.

Development properties are analysed as follows:

	31 March 2019 EGP	31 December 2018 EGP
Mivida project	3,900,546,012	3,543,869,085
Marassi project	4,529,566,548	4,237,546,714
Uptown Cairo project	4,593,354,376	4,320,277,814
Cairo Gate project	216,176,198	215,340,091
	13,239,643,134	12,317,033,704
Less: Impairment of development properties	(519,595)	(519,595)
	13,239,123,539	12,316,514,109

These checks represent future instalments according to payment schedule of each customer according to company's policies.

35 FINANCIAL INSTRUMENTS RISK MANAGEMENT OBJECTIVES AND POLICIES

Overview

The Company has exposure to the following risks from its use of financial instruments:

- a) Credit risk,
- b) Market risk, and
- c) Liquidity risk.

This note presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risk, and the Company's management of capital.

The Board of Directors of the Parent Company has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company's senior management are responsible for developing and monitoring the risk management policies and report regularly to the Parent Company on their activities.

The Company's current financial risk management framework is a combination of formally documented risk management policies in certain areas and informal risk management policies in other areas.

a) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company is exposed to credit risk principally from its receivables from customers, due from related parties, other receivables and from its financing activities, including deposits with banks and financial institutions.

Trade and notes receivables

The Company has entered into contracts for the sale of residential and commercial units on an instalment basis. The instalments are specified in the contracts. The Company is exposed to credit risk in respect of instalments due. However, the legal ownership of residential and commercial units is transferred to the buyer only after all the instalments are recovered. In addition, instalment dues are monitored on an ongoing basis with the result that the Company's exposure to bad debts is not significant.

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The demographics of the Company's customer base, including the default risk of the industry and country, in which customers operate, has less influence on credit risk. The Company earns its revenues from a large number of customers.

Other financial assets

With respect to credit risk arising from the other financial assets of the Company at amortised cost, the Company's exposure to credit risk arises from default of the counterparty, with a maximum exposure equal to the carrying amount of these assets.

Bank Balances

The Company reduces the credit risk related to bank balances by dealing with reputable banks. Credit risk from balances with banks and financial institutions is managed by local Company's treasury supported by the Parent Company. The Company limits its exposure to credit risk by only placing balances with international banks and local banks of good repute. In addition, the local banks are under the supervision of the central Bank of Egypt and thus their exposure to credit risk is minimal.

Due from related parties

Due from related parties relates to transactions arising in the normal course of business with minimal credit risk, with a maximum exposure equal to the carrying amount of these balances.

35 FINANCIAL INSTRUMENTS RISK MANAGEMENT OBJECTIVES AND POLICIES (Continued)**b) Market risk**

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices, such as currency risk and interest rate risk, which will affect the Company's income. Financial instruments affected by market risk include credit facilities and deposits. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return. The Company does not hold or issue derivative financial instruments.

Exposure to interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's obligations with floating interest rates and interest bearing time deposits.

Interest on financial instruments having floating rates is re-priced at intervals of less than one year.

The following table demonstrates the sensitivity to a reasonably possible change in interest rates with all other variables held constant, of the Company's profit before tax (through the impact on floating rate borrowings).

There is no impact on the Company's equity other than the profit impact stated below.

	31 March 2019		31 March 2018	
	Change in rate	Effect on profit before tax EGP	Change in rate	Effect on profit before tax EGP
Financial asset	+1%	24,834,184	+1%	68,351,911
	- 1%	(24,834,184)	- 1%	(68,351,911)
Financial liability	+1%	(28,018)	+1%	(28,018)
	- 1%	28,018	- 1%	28,018

The interest rates on loans from related parties are described in Note 11-b to the consolidated financial statements. Interest rates on credit facilities from financial institutions are disclosed in Note 14 to the consolidated financial statements.

Exposure to foreign currency risk

The following tables demonstrate the sensitivity to a reasonably possible change in USD, EUR, AED, SAR and GBP exchange rates, with all other variables held constant. The impact on the company's profit before tax is due to changes in the value of monetary assets and liabilities. The company's exposure to foreign currency changes for all other currencies is not material.

	31 March 2019		31 March 2018	
	Change in rate	Effect on profit before tax EGP	Change in rate	Effect on profit before tax EGP
USD	+10%	35,037,968	+10%	5,227,025
	-10%	(35,037,968)	-10%	(5,227,025)
AED	+10%	4,907,154	+10%	(683,916)
	-10%	(4,907,154)	-10%	683,916
EUR	+10%	1,309,872	+10%	1,057,412
	-10%	(1,309,872)	-10%	(1,057,412)
SAR	+10%	390,944	+10%	176,025
	-10%	(390,944)	-10%	(176,025)

35 FINANCIAL INSTRUMENTS RISK MANAGEMENT OBJECTIVES AND POLICIES (Continued)**c) Liquidity risk**

The cash flows, funding requirements and liquidity of the Company are monitored by local company management supported by the Parent Company. The Company's objective is to maintain a balance between continuity of funding and flexibility through the use of bank borrowings. The Company manages liquidity risk by maintaining adequate reserves and borrowing facilities, by continuously monitoring forecasted and actual cash flows and matching the maturity profiles of financial assets and liabilities.

The Company currently has sufficient cash on demand to meet expected operational expenses, including the servicing of financial obligations.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted payments.
